

Installation Guide

IE-MiniMc

About the IE-MiniMc

The *IE-MiniMc* Series of Industrial Ethernet, miniature media converters features 10/100 switching copper-to-fiber conversion, plug-and-play operation, and a miniature size and complies with the IEEE 802.3af Power over Ethernet standard. In addition, *IE-MiniMc* also includes an extended voltage range; an extended operating temperature; and DIN clips for mounting the enclosure on a DIN-rail.

IE-Mini Operation	3
LED Operation	4
Safety Certifications	6
Warranty	6

Installing the IE-MiniMc

IE-MiniMc installs virtually anywhere: as a standalone, table-top device or on a DIN-rail.

As a standalone device, install *IE-MiniMc* in locations with extremely limited space. You can also use the included velcro strips to attach the device to most surfaces.

DIN-RAIL MOUNTING

The *IE-MiniMc* ships from the factory with DIN-clips, allowing installation on a DIN-rail. Depending on the installation, you can mount *IE-MiniMc* parallel or perpendicular to the DIN-rail.

Use the supplied screws to attach the DIN clips to the *IE-MiniMc*, then snap the converter to the DIN-Rail.

NOTE: The DIN clips are designed for use on a DIN-35 rail.

To remove the converter from the DIN-rail, use a flat-blade screwdriver in the slot to gently pry the converter from the rail.

Powering the IE-MiniMc

IE-MiniMc includes multiple powering options. You can use any of the following options, or more than one for redundancy:

- A country-specific, high-reliability AC power adapter (included)
- A USB-power cord (not included)
- The **IEEE 802.3af** Power over Ethernet standard; draws power from power sourcing equipment
- The 4-terminal DC power block

ABOUT POWER OVER ETHERNET AND IE-MINI-MC

The Power Over Ethernet technology allows the *IE-MiniMc* to be a Powered Device (PD) and draw power when connected to Power Sourcing Equipment (PSE) that is also compliant with the IEEE 802.3af standard. Power Source Equipment distributes an electrical current across existing copper data cabling.

DC POWER SUPPLY WIRING INSTRUCTIONS

You can also power the *IE-MiniMc* with the DC terminal block. The following illustration shows the positive and negative terminals for *IE-MiniMc*. From a power source, connect to any one positive and any

one negative terminal on *IE-MiniMc*. See below for a diagram showing how to cascade DC power.

NOTE: If you are using standard wire, you must “tin” the leads; use solid wire as is.

NOTE: The chassis is protected against mis-wiring; if mis-wired the chassis will merely not function.

CASCADING DC POWER

When installing multiple *IE-MiniMc* units on a DIN-rail, you can use one DC input source then cascade from one DC block to the next, until reaching the maximum current available.

IE-MiniMc Operation

IE-MiniMc is a 10/100 auto-negotiating, miniature media converter. The fiber port always operates at 100 Mbps FDX; the copper port auto-senses the connected device’s speed and duplex mode: 10 Mbps or 100 Mbps and HDX or FDX (including Flow Control).

IE-MiniMc offers plug-and-play operation, including the AutoCross feature which automatically selects between a crossover work-station or pass-through connection depending on the connected device. *IE-MiniMc* also protects against Broadcast storms, and allows jumbo packets of up to 1916 bytes.

LED Operation

Each *IE-MiniMc* includes two LEDs, located on the RJ-45 connector. LED functions are as follows:

FX LNK/ACT: Glows green when a link is established on the fiber port; blinks green when activity is detected on the fiber port.

TX LNK/ACT: Glows green when a link is established on the copper port; blinks green when activity is detected on the copper port.

Specifications

DC Input Voltage:

5 to 50 VDC on DC terminal and DC jack

PoE Voltage:

When *IE-MiniMc* uses the PoE technology to be a PD, the maximum supply voltage is 50V

AC Wall Adapter:

100/240 \pm 10% VAC input, 5V DC output, 1A max.

Operating Temperature:

-49° to +158°F (-45° to +70°C) excluding AC wall adapter; with AC wall adapter 32° to 122°F (0° to 50°C)

Storage Temperature:

-49° to 185°F (-45° to +85°C)

Humidity:

5 – 90% (non-condensing); 0 – 10,000 ft. altitude

Dimensions:

.83”H x 1.80”W x 3.35”D (2.11 x 4.57 x 8.51 cm)

FIBER OPTIC CLEANING GUIDELINES

Fiber Optic transmitters and receivers are extremely susceptible to contamination by particles of dirt or dust which can obstruct the optic path and cause performance degradation. Good system performance requires clean optics and connector ferrules.

1) Use fiber patch cords (or connectors, if you terminate your own fiber) only from a reputable supplier; low quality components can cause many hard-to-diagnose problems in an installation.

2) The manufacturer installs dust caps to ensure factory-clean optical devices. These protective caps should not be removed until the moment of connecting the fiber cable to the device. Assure that the fiber is properly terminated, polished and free of any dust or dirt and that the location is as free from dust and dirt as possible.

3) Store spare caps in a dust-free environment such as a sealed plastic bag or box so that when reinstalled they do not introduce any contamination to the optics.

4) Should it be necessary to disconnect the fiber device, reinstall the protective dust caps.

5) If you suspect that the optics have been contaminated, alternate between blasting with clean, dry compressed air and flushing with methanol to remove particles of dirt.

ELECTROSTATIC DISCHARGE PRECAUTIONS

Electrostatic discharge (ESD) can cause damage to your add-in modules. Always observe the following precautions when installing or handling an add-in module or any board assembly.

1) Do not remove unit from its protective packaging until you're ready to install it.

2) Wear an ESD wrist grounding strap before handling any module or component. If you do not have a wrist strap, maintain grounded contact with the system unit throughout any procedure requiring ESD protection.

WARNING! Integrated circuits and fiber optic components are extremely susceptible to electrostatic discharge damage. Do not handle these components directly unless you are a qualified service technician and use tools and techniques that conform to accepted industry practices.

3) Hold boards by the edges only; do not touch the electronic components or gold connectors.

4) After removal, always place the boards on a grounded, static free surface, ESD pad or in a proper ESD bag. Do not slide the board over any surface.

DC POWER SUPPLY PRECAUTIONS

The following precautions should be observed when installing chassis with DC power supplies.

1) Check nameplate ratings to assure there is no overloading of supply circuits that could have an effect on overcurrent protection and supply wiring.

2) When installing 48V DC rated equipment, it must be installed only per the following conditions:

A) Connect the equipment to a 48V DC supply source that is electrically isolated from the alternating current source. The 48V DC source is to be connected to a 48V DC SELV source.

B) Input wiring to terminal block must be routed and secured in such a manner that it is protected from damage and stress. Do not route wiring past sharp edges or moving parts.

C) A readily accessible disconnect device, with a 3mm minimum contact gap, shall be incorporated in the fixed wiring.

3) Grounding: reliable earthing of this equipment must be maintained. Particular attention should be given to supply connections when connecting to power strips, rather than direct connections to the branch circuit.

FEDERAL COMMUNICATIONS COMMISSION RADIO FREQUENCY INTERFERENCE STATEMENT

This equipment has been tested and found to comply with the limits for a Class B computing device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which the user will be required to correct the interference at his own expense.

This digital apparatus does not exceed the Class B limits for radio noise emission from digital apparatus set out in the Radio Interference Regulation of the Canadian Department of Communications.

Le présent appareil numérique n'émet pas de bruits radioélectriques dépassant les limites applicables aux appareils numériques de classe B prescrites dans le Règlement sur le brouillage radioélectrique publié par le ministère des Communications du Canada.

SAFETY CERTIFICATIONS

UL/CUL: Listed to Safety of Information Technology Equipment, Including Electrical Business Equipment.

CE: The products described herein comply with the Council Directive on Electromagnetic Compatibility (89/336/EEC) and the Council Directive on Electrical Equipment Designed for use within Certain Voltage Limits (73/23/EEC). Certified to Safety of Information Technology Equipment, Including Electrical Business Equipment. For further details, contact IMC Networks.

WARRANTY

IMC Networks warrants to the original end-user purchaser that this product, EXCLUSIVE OF SOFTWARE, shall be free from defects in materials and workmanship under normal and proper use in accordance with IMC Networks' instructions and directions for a period of six (6) years after the original date of purchase. This warranty is subject to the limitations set forth below.

At its option, IMC Networks will repair or replace at no charge the product which proves to be defective within such warranty period. This limited warranty shall not apply if the IMC Networks product has been damaged by unreasonable use, accident, negligence, service or modification by anyone other than an authorized IMC Networks Service Technician or by any other causes unrelated to defective materials or workmanship. Any replaced or repaired products or parts carry a ninety (90) day warranty or the remainder of the initial warranty period, whichever is longer.

To receive in-warranty service, the defective product must be received at IMC Networks no later than the end of the warranty period. The product must be accompanied by proof of purchase, satisfactory to IMC Networks, denoting product serial number and purchase date, a written description of the defect and a Return Merchandise Authorization (RMA) number issued by IMC Networks. No products will be accepted by IMC Networks which do not have an RMA number. For an RMA number, contact IMC Networks at PHONE: (800) 624-1070 (in the U.S and Canada) or (949) 465-3000 or FAX: (949) 465-3020. The end-user shall return the defective product to IMC Networks, freight, customs and handling charges prepaid. End-user agrees to accept all liability for loss of or damages to the returned product during shipment. IMC Networks shall repair or replace the returned product, at its option, and return the repaired or new product to the end-user, freight prepaid, via method to be determined by IMC Networks.

IMC Networks shall not be liable for any costs of procurement of substitute goods, loss of profits, or any incidental, consequential, and/or special damages of any kind resulting from a breach of any applicable express or implied warranty, breach of any obligation arising from breach of warranty, or otherwise with respect to the manufacture and sale of any IMC Networks product, whether or not IMC Networks has been advised of the possibility of such loss or damage.

EXCEPT FOR THE EXPRESS WARRANTY SET FORTH ABOVE, IMC NETWORKS MAKES NO OTHER WARRANTIES, WHETHER EXPRESS OR IMPLIED, WITH RESPECT TO THIS IMC NETWORKS PRODUCT, INCLUDING WITHOUT LIMITATION ANY SOFTWARE ASSOCIATED OR INCLUDED. IMC NETWORKS SHALL DISREGARD AND NOT BE BOUND BY ANY REPRESENTATIONS OR WARRANTIES MADE BY ANY OTHER PERSON, INCLUDING EMPLOYEES, DISTRIBUTORS, RESELLERS OR DEALERS OF IMC NETWORKS, WHICH ARE INCONSISTENT WITH THE WARRANTY SET FORTH ABOVE. ALL IMPLIED WARRANTIES INCLUDING THOSE OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE HEREBY LIMITED TO THE DURATION OF THE EXPRESS WARRANTY STATED ABOVE.

Every reasonable effort has been made to ensure that IMC Networks product manuals and promotional materials accurately describe IMC Networks product specifications and capabilities at the time of publication. However, because of ongoing improvements and updating of IMC Networks products, IMC Networks cannot guarantee the accuracy of printed materials after the date of publication and disclaims liability for changes, errors or omissions.
